

4W HotSpot UL Classified Kit

- <4W Input Power</li>
- 450 Lumen output
- To be operated with FHS1-UNV-3.6L only

#### • Wall Sconce and Ceiling Flush Mount compatible

- Low Level Lighting
- Linear arrays are linkable

| Ambient Temperature 0°C - 50°C  |  |
| Warranty 5 Years  |  |

### HotSpot UL Classified Kit components

\*For further detailed instructions and list of kit components please refer to the Installation Instructions.

\*Self-Diagnostic Standard. \*Self-Diagnostic comes factory disabled. Please reference pg.4 for more details.

4W HotSpot UL Classified Kit

**Part Number Matrix** 

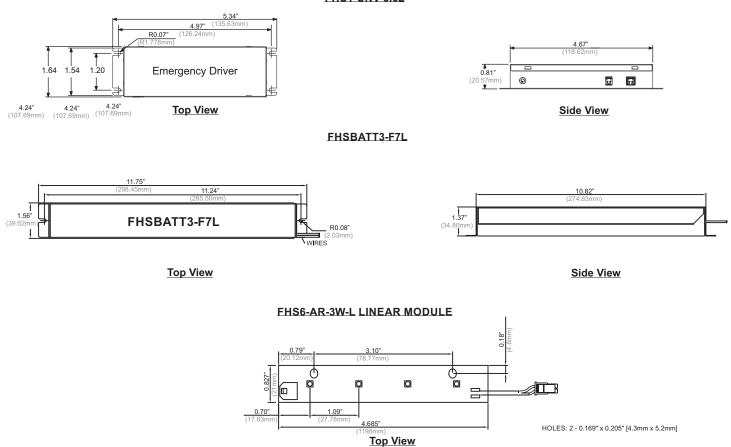

<u>Retrofit Type</u> T = Troffer LED Wattage 03 = 3W

<u>LED Type</u> **LN** = Linear Battery Type F = F Cell

Case Type L = Long

| Blinking OFF<br>(0.5 sec on – 4.5 sec off)               | Charge circuit is broken                    | Replace EM Driver                        |  |  |
| Fast Flashing<br>(0.5 sec on - 0.5 sec off)              | Battery not connected                       | Connect battery pack.                    |  |  |
| Fast Flashing<br>(0.5 sec on - 0.5 sec off)              | Battery failure                             | Change the battery                       |  |  |
| Very Slow Flashing<br>(4 sec on – 4 sec off)             | Over Circuit Protection<br>Error Triggered. | Check LED load or<br>check<br>EM driver. | AC power will need to be<br>cycled on/off as well as the<br>battery re-connected |  |

#### **TEST SWITCH OPERATIONS:**

1. EM TEST : Press and hold test button for more than one second to enter EM mode for testing.

2. Manual Self-Diagnostic : After charging the battery for the specified recharge time, quickly press the test button three times within two seconds to force the controller to enter a Self-Diagnostic cycle. o quit the self-diagnostic cycle after engaged press and hold the test button for ten seconds.

3. Enable/Disable Self-Diagnostic Status : Quickly press the test button two times within two seconds ,the monochromatic lamp displays the status of Self-Diagnostic Enable / Disabled settings.

4. Enable/Disable Auto Self-Diagnostic : Press and hold the test button for two seconds, then release and quickly press the test button two times, then release and press and hold the test button for two more seconds. When properly executed the indicator on the test button will display the flash mode for the Enable/Disable status. A flash of 2.5S on - 0.5S off means "Enabled", while a flash of 0.5S on - 2.5S off means "Disabled", the flashing will last for a few cycles.

### **SELF- DIAGNOSTIC INSTRUCTIONS / OPERATION:**

#### If the self-diagnostic feature is enabled:

The emergency LED driver will conduct a self-check for thirty (30) seconds every thirty (30) days; and a ninety (90) minute self-check every 12 months. After every self-check the LED indicator light will indicate a status signal. Check indicator status chart above to diagnose the status signal.

#### If the self-diagnostic feature is disabled:

User must conduct a manual test every thirty (30) days to ensure the emergency LED light source illuminates as intended. A full discharge test shall be conducted once a year; the LED light source shall illuminate for a minimum of ninety (90) minutes.

### \*Self-Diagnostic feature is factory disabled
